

Arman Attar

Test Engineer (SDET)

Experienced **SDET engineer with 3.5 years** in the industry in various domains such as Banking, Ecommerce/Retail, etc., leading test operations in teams of varying sizes in designing and conducting complex test cases & scenarios. Created and maintained **4+ automation** testing frameworks and optimized documentation & reporting preparation procedures. Applying expertise towards boosting revenue and reducing operational costs for companies through implementing targeted **quality assurance** processes.

Tech Quality & Test Engineer

[MAY, 2024 - Present]

UBS Business Solutions, Pune, Maharashtra

- Built a **modular and reusable** test automation framework for backend data validation on databricks and database using Python and Pytest
- Incorporated **parameterized** test cases with Excel-based test data management for flexibility and scalability.
- Integrated **Allure reporting** for detailed user-friendly test execution
- Created **complex SQL queries** to validate the data on databricks as well as on PostgreSQL database
- Worked on **PowerBI** reports to compare the data against Database.
- Created UI Automation Framework for web application using **Selenium** and **Pytest** that helped to reduce manual testing efforts by **50%**
- Automated database query validation for both **Databricks Delta lake and PostgreSQL**
- Developed **robust pipeline** to verify Gitlab Jobs dynamically using branch based Filtering
- Validations ensured **databases consistency** and pipeline success improving overall **system stability**

Test Engineer (SDET)

[SEP, 2021 - MAY,2024]

Infosys Limited, Pune, Maharashtra
(UBS Investment Bank)

- Created both **UI and API automation** framework using Java with Selenium. Created a utility using Extent report which gives impressive testing execution results.
- Optimized and gathered documentation and reporting preparation procedures which **cut down reporting time by 40%**.
- Handled a very big release in which I had covered **191 functional** test cases, **500 regression** test cases and 4 Performance test cases. For handling this **got appreciated** by client/stake holders as well.
- Reduced a week-long testing process to 1 day via **CICD pipeline**.
- Using JMeter Created a **Performance test** pack for **4 API** endpoints Generated HTML report for the same. Analyzed the results of this Performance testing by going through **azure metrics**.
- Created a Hybrid UI Automation Framework for web application using **BDD, Cucumber and Selenium** that resulted in a decrease in test execution time to **90%**.
- Led an initiative alongside the Automation team to create regression test suites for all systems which induced a **45% reduction** in testing which allowed for faster production deployment.
- Utilized **docker container** images for CICD pipelines. Had ran **daily jobs** for those pipelines using GitLab pipeline schedulers.

SKILLS

- Amplitude Regression, Functional & Performance Testing.
- ETL, Database Testing
- E2E manual testing
- Automation testing

Automation & test tools:

- Selenium/Web driver
- Postman
- JMeter
- TestNG/Junit
- Cucumber

Technologies:

- Rest Assured
- Azure
- Database – PostgreSQL
- BDD
- TDD
- Testing
- DevOps
- Linux / Windows
- Databricks
- PostgreSQL

Process management:

- Agile
- Gitlab
- JIRA

Languages:

- Python
- Java
- SQL

Education:

- B-Tech in Electrical Engineering
- Graduation Year: 2021
- CGPA: 8.38

Certification:

- Gitlab Certified Git Associate
- MS Azure 900 Fundamentals
- MS Azure 104 Administrator
