Professional Summary

Software Test Engineer with 4 years of experience in automation testing, CI/CD, and data validation. Expertise in Selenium, Java, Python, Databricks, and SQL. Proven success in reducing testing cycles, optimizing pipelines, and improving data integrity. Applying expertise towards boosting revenue and reducing operational costs for companies through implementing targeted quality assurance processes.

Projects & Key Achievements

- Test Automation Frameworks: Developed **4+ frameworks** for API, UI, and database validation.
- Performance Optimization: Reduced test cycles **by 90%** with automation.
- Data Engineering & Validation: Ensured data integrity for large-scale Databricks datasets!
- CI/CD Automation: Improved deployment reliability through **automated test pipelines**.

Education & Certifications

BATU University , Lonere, BTech in Electrical Engineering

Aug 2017 – Aug 2021

- CGPA: 8.38/10.0
- **Certifications:** Infosys Certified SDET, GitLab Certified Git Associate, Azure Fundamentals (AZ-900), Azure Administrator (AZ-104)

Experience

Tech Quality & Test Engineer, UBS Business Solutions – Pune

May 2024 – Present

- Developed and implemented **modular test automation** frameworks using Python & Pytest, improving test efficiency by 50%.
- Automated database query validation for Databricks and PostgreSQL using Python, ensuring data consistency across **15+ pipelines** and reducing data discrepancies by 22% weekly.
- Built a UI Automation Framework using **Selenium & Pytest**, reducing manual efforts by **50%**.
- Implemented automated end-to-end testing for critical user workflows, preventing **35+ bugs** from reaching production.
- Designed robust **GitLab CI/CD pipelines** with unified job verification approach.

Test Engineer (SDET), Infosys – Pune

Sept 2021 – May 2024

- Designed and maintained **UI & API automation** frameworks using **Java, Selenium, and Rest Assured**, accelerating test cycles by **70%**.
- Reduced regression testing efforts by 45% through strategic automation initiatives, enabling faster releases.
- Optimized test reporting with Extent Reports, cutting reporting time by **40%**.
- Improved performance testing using **JMeter**, integrating results with **Azure metrics**.
- Cut down week-long testing cycles to one day via CI/CD automation.

Technologies

Programming Languages: C, Python , Java, SQL

Technologies: Selenium WebDriver, Pytest, TestNG, JUnit, Cucumber, Postman, JMeter, REST Assured, Databricks, PostgreSQL, GitLab CI/CD, Docker, Azure DevOps, Git, Agile, Scrum, JIRA
